Life Choices

Reading

A Learned Lesson is a Good Lesson

Our life is a short journey, and every day we learn many important lessons that we must benefit from in order to be able to achieve more successes, and to make life beautiful and prosperous.

Most people think that education is limited to schools only, but the truth is that there are lessons that we can only learn from life, and they may be more important

than those learnt at schools. Life lessons are sometimes painful before they are acquired, and in order to avoid this, we must benefit from the experiences of others.

We shouldn't pay too much attention to the trivial things that are not important and waste our time and effort. Since life is so unpredictable, we must not live on expectations only and meet everything new in life with optimism and positive thinking. There is no word more boring and monotonous than the word "I". We must be confident of ourselves, but that does not mean we talk about ourselves and our accomplishments all the time, as this inherits vanity. Human relationships are also important because without love and support from family and friends, you will not feel happy and will not achieve success in life.

Man by nature makes mistakes, so be tolerant and seek excuses for those around you, and if someone comes to you with an apology, do not stop him, and do not carry in your heart any envy of anyone. There are no alternatives to exercising, eating well, fresh air and sunshine. Take care of your health and make it a priority for your entire life.

The pursuit of success will make you succeed in the end, no matter how long the period is, but keep trying. Failure is a great teacher in life. It teaches us humility and how to correct our course of life. A great example is Thomas Edison. He failed many times, but he did not give up until he succeeded. Even when he failed, Edison learned something. 'I get results in everything I try,' he said.

The golden rule for everybody is to be honest, trustful, useful and generous so that they leave life with a trace that those around them will not forget about.

- a** This is Jane's first letter in English to David. There are some mistakes in it. Cross out the incorrect forms and correct them. Put a tick ✓ if the form of the verb is correct.

Dear David,

I live.....✓..... in a large flat in Madrid. ~~I'm having~~ have two sisters. They are called Mary and Rose. We are getting up ⁽¹⁾ at seven o'clock every morning, and we have ⁽²⁾ coffee. I leave ⁽³⁾ the flat at eight and walk to the university. I am finishing ⁽⁴⁾ classes at five, and I arrive ⁽⁵⁾ home at six. This month I work ⁽⁶⁾ very hard for my first exams.

At the moment, I eat ⁽⁷⁾ breakfast in the kitchen of our flat: my mother drinks ⁽⁸⁾ coffee, and my sisters are reading ⁽⁹⁾ magazines. On Saturday afternoons, I am playing ⁽¹⁰⁾ tennis with my friends, or I go ⁽¹¹⁾ to the cinema. Today, I'm going to see an English film! Sometimes I watch American films on TV, but I'm not understanding ⁽¹²⁾ the words! Are you liking ⁽¹³⁾ Films?

With best wishes,

Jane

- b** Complete the conversation with the correct form of the verbs in brackets. Use the past simple or present perfect.

Writing

Personal Experience

- a ► Connect each topic sentence to the correct details to make paragraphs. Then number the paragraphs to put the text in order.

1

When the test day came, I was confident I would do well.

2

Have you ever had a day you wished never happened?

3

Actually, I had known we had an important test to get ready for.

4

To tell the truth, I don't think I have ever felt that bad.

I shouldn't have thought I could pass a test without studying.

However, the test was awful, and I could not understand anything.

For me, it was a day in tenth grade when I had a math test.

The teacher had told us to prepare carefully for it.

That day taught me to listen to my teacher and prepare properly.

From that day on, I decided to study harder.

But I hadn't studied at all for the test.

Later, when I got my score and saw 5%, I was angry with myself.

- b ► Life is about the choices and decisions we make. Write about a personal experience in which you have made an important decision that changed your life.

When writing a personal experience, you should describe actions and feelings, and maybe something you learned. You can write this kind of essay in the following way:

Unit 2

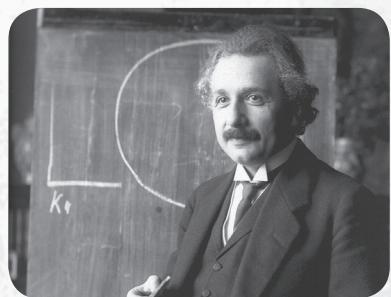

Success

Reading

Famous Failures Who Refused to Give up

One of the most destructive moments in our lives is failure. When we work hard and keep faith with clear heart and soul to accomplish something and fail, it will surely have negative consequences for our lives. When we fail, life turns upside down. Everything seems to disappear into thin air. However, most people don't realise that failure acts as a **stepping-stone** towards success. They don't know that we can learn more about our lives when we fail. Throughout history, there have been many famous people who had once the greatest failures in their lives, but later they could learn from their experience and were able to reach the top.

Thomas Edison is by far one of the most famous inventors in history. He holds 1,093 **patents** to his name. However, when attempting to invent a commercially-viable electric lightbulb, he failed over 10,000 times. When asked by a reporter how it felt to fail so many times, he merely stated, "I have not failed 10,000 times. I have not failed once. I have succeeded in proving that those 10,000 ways will not work. When I have **eliminated** the ways that will not work, I will find the way that will work."

Albert Einstein, one of the greatest thinkers of our time, didn't speak until he was four-years old. He also failed his entrance exam to the Swiss Federal Polytechnic school located in Zurich at sixteen-years old. And, even his father, up until the time of his death, considered his son to be a major failure. After eventually graduating from college, Einstein actually worked as an **insurance** salesman, but quit after some time because he failed at that as well.

Bill Gates has amassed a **mind-boggling** net worth of close to \$80 billion, and is known as the infamous father of modern personal-computing software. He brought us operating systems such as Microsoft DOS and Windows, along with wildly-popular titles such as Microsoft Office's Word, Excel and PowerPoint. However, at the age of seventeen-years old, his first software company called, Traf-O-Data, which analyzed raw traffic logs, failed.

Walt Disney is the creative genius who brought us the likes of Mickey Mouse, Donald Duck and Snow White. He created the Walt Disney Company after his own namesake. Yet, he faced many failures. His first company, Laugh-O-Gram went **bankrupt**. It wasn't until 5 years later and plenty of heartache - after he created Mickey Mouse - did he begin to experience a small amount of success and fame.

a Read the text and answer the following questions.

1. What are the good sides and bad sides of failures?

.....
2. How did Edison react to his failures?

Writing

Writing Skill

Essays about how others influenced you can tell a lot about how you learn and how you relate to others. It's important to connect the lessons and influences from him/ her back to your own life. To start writing you should follow these steps:

Step 1: Identify who has an impact on you

To start your essay, you should answer at least three of the following questions:

1. Who has been an influential person in your life?
2. What do you admire the most about this person?
3. What specific things have you learned from this person?

4. Which of his traits (e.g., special talents, skills, way of treating others) do you hope to have yourself one day?

5. How has your life changed since meeting your role model?

Step 2: Find some examples from this person and then try to connect them back to you

Step 3: End strong by adding something for the reader to think about.

a

Match each paragraph from different essays to the suitable step (1, 2 or 3).

I know I will face many new challenges in college, but I also know that if I apply the lessons from my coach, I will be able to overcome any obstacle. Whenever things get really tough, I'll just repeat his words, "It's not about failing but about rising back up every time we fall."

Step

My uncle is always willing to help out a neighbor. I also believe it's important to contribute to my community and have been involved with a lot of public service projects including an effort to help the homeless.

Step

"My English teacher has inspired me to pursue a career in education. She has also taught me how important it is to be patient with students and to always encourage them to live up to their potential."

Step

b

Write an essay about someone who has influenced you to be the best version.

Medical Inventions

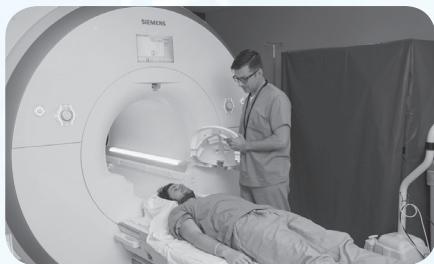

Over the years, technology has played a significant role in developing the medical science. Advances in medicine have created alternatives to dangerous or even ineffective procedures. Breakthroughs have found new solutions to historical medical challenges and have opened up possibilities beyond what doctors thought was impossible years ago. Today's techniques, surgeries and drugs have decreased the overall deaths among humans. Medical inventions like X-ray Imaging, functional Magnetic Resonance Imaging (MRI), Robotic Surgery and Organ Transplants have changed medicine forever.

X-ray Imaging

An X-ray is a common imaging test that has been used for decades. It is an image created on a photographic film or electronically on a digital system, using an external radiation to produce images of the body. X-ray Imaging can help doctors view the inside of the patient's body without having to make an incision. This can help surgeons diagnose, monitor and treat many medical conditions.

Magnetic Resonance Imaging (MRI)

Magnetic Resonance Imaging (MRI) is a medical imaging technique used in radiography to form pictures of the anatomy and the physiological-processes of the body. MRI scanners use strong magnetic fields and radio waves to generate images of the organs in the body. MRI allows to access soft tissues and bone marrow involvement in case of the inflammation and infection.

Robotic Surgery

Robotic Surgery is usually associated with minimally invasive procedures. During Robotic Surgery, surgeons can perform very complex steps with more precision, flexibility and control than it is possible with conventional techniques. Compared to traditional open surgery, Robotic Surgery results in smaller incisions which reduce pain and lead to less time spent in hospitals and quicker recovery time.

Organ Transplant

Such an invention can greatly improve the health of patients, allowing them to return to normal activities. Moreover, doctors have been successfully transplanting various body parts like heart, liver and kidney and have performed various brain surgeries, too. Besides, artificial heart transplanting has evolved over decades saving countless lives.

In summary, the emerging medical devices and technologies, especially the mobile phones and tiny Nano-sized sensors embedded in several electronic devices that enable sending and receiving information wirelessly, are changing the face of 21st century medical practice. Currently, people born with diseases or any other body defects can now be healed with the help of advanced technology. Furthermore, various advances in medical field have saved millions of lives and improved many others. The new technologies will allow remote monitoring of patients and their access to healthcare, health data collection and information exchange with the providers and other patients. Such benefits would continue to increase with the fast pace development of medical health technologies.

b

Read the text and answer the following questions.

1. What role have new discoveries played in developing medical science?

.....

3. “*Peter* told John that *a deal like this* wasn't allowed.”
4. “*Peter* told John that a deal like this *wasn't allowed*.”

- a. It clarifies that John was told not to make the deal, not someone else.
- b. It clarifies that Peter, as opposed to someone else, told John not to make the deal.
- c. It emphasizes that Peter said the deal was not allowed, indicating that John thought or said the opposite.
- d. It emphasizes the fact that John had been told not to make the deal but did so anyway.

Grammar Passive Voice

We use the passive voice when we don't know or aren't interested in who or what does the action.

Passive Forms

The basic formation is *be + past participle*.

Tense	Example
Present Simple Passive	Bridges are built over the river by the government.
Past Simple Passive	Bridges were built over the river by the government.
Present Continuous Passive	Bridges are being built over the river by the government.
Past Continuous Passive	Bridges were being built over the river by the government.
Present Perfect Passive	Bridges have been built over the river by the government.
Past Perfect Passive	Bridges had been built over the river by the government.
Present Passive with Modal	Bridges will be built over the river by the government.
Past Passive with Modal	Bridges would have been built over the river by the government.

- We can use the passive and still say who or what performs the action by using (*by*) or (*with*).

e.g. *The basement has been flooded by the washing machine.*

The lights were switched on with the car phone.

- We can use the passive forms with verbs of speech or thought such as (say, believe, expect, report...) to show that you are not sure of the truth of the statement. (Such verbs have no objects).

e.g. *They believe that the government will reduce the taxes.*

It is believed that the government will reduce the taxes. (It + passive + that clause)

The government is believed to reduce the taxes. (subject + passive + to + infinitive)

- Sentences with verbs of two objects can have two different forms in the passive. When these verbs are used in the passive, we usually begin with the person.

e.g. *The teacher gave the students plenty of time to finish the exam.*

The students were given plenty of time to finish the exam.

Plenty of time was given to the students to finish the exam.

- Only transitive verbs (verbs with an object) can be made passive. Some transitive verbs cannot be made passive: *become, fit, get, have, lack, let, like, resemble, suit*.

a Change the following sentences into passive as in the example.

e.g. *People say Tom Cruise is the richest movie star.*

- *It is said that Tom Cruise is the richest movie star.*
- *Tom Cruise is said to be the richest movie star.*

1. They reported that the railway line was buried under tons of rocks and earth.

a Before you read, match the words with their meanings.

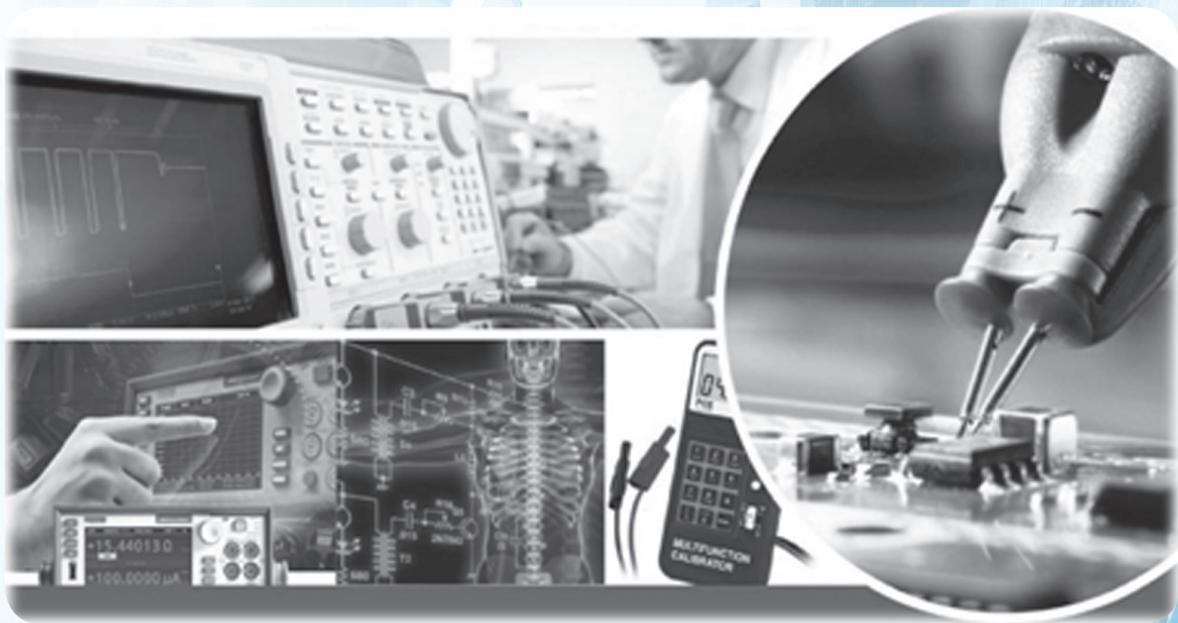

- | | |
|----------------|--|
| 1. discipline | a. to carry out or do something |
| 2. limb | b. a medical process using the reflections of high-frequency sound waves to construct an image of a body organ |
| 3. ultrasound | c. an arm or a leg |
| 4. therapeutic | d. a field of study |
| 5. conduct | e. relating to the treatment or cure of an illness |

Medical Technology Engineering

- A. As a result of the substantial scientific and technological development that affected many disciplines, many branches have appeared within the specialisation of engineering in particular, including medical technology engineering, which is also called biomedical engineering. This field is concerned with studying the body from an engineering point of view, in order to design suitable artificial limbs, organs, or other medical devices.

- B. Medical technology engineering helps doctors define their tasks and facilitates their work more, so the medical device has become an essential assistant for the doctors in all steps, starting from diagnosis, to the end of the treatment course. The need for development in this field has made designing medical devices a great priority, and this in turn led to the intervention of electrical, mechanical computer engineers and others, whose knowledge does not depend on their specialties only, but rather, they must be familiar with all aspects of human body, from biology, anatomy and physiology. So that the medical devices designed are useful for the human body.
- C. Medical devices can be divided into two parts, diagnostic medical devices, most notably the ultrasound device, and medical therapeutic devices used in chemical treatments. Another classification includes three categories. Firstly, we have simple devices such as bandages, body temperature meters and others. There are also more complex devices that require a certain amount of caution, such as those that emit X-rays. Finally, there are those which require a deep study before their use, such as the valves used in the artificial heart, in addition to the artificial joints.
- D. Medical engineers work in many fields like well-equipped hospitals and clinics in particular, medical companies and the advanced major research centers in universities. In the end, medical engineers work in cooperation with all disciplines, including nursing, medicine, biology, and other disciplines.
- E. In short, it is certain that this new branch of engineering has improved healthcare to a great extent. Furthermore, the design process is better as a result of new technology with 3D printing being the most favoured new tool. Nowadays biomedical engineers are able to develop new procedures using knowledge from many technical sources; or conduct research needed to solve clinical problems.

With so many free resources and technology available, many students are able to find different ways to start their own small business while they are still in college.

SHABAB Strategy Highlighting and Building Abilities for Business is one of the projects of the Syrian Trust for Development headed by *Asma al-Assad*. It is a non-profit Syrian project that works on rehabilitating the skills of young people between the ages of 15 and 24 and developing their basic skills. It is the first project of its kind in Syria that aims to support the culture of organising and operating a business among Syrian youth to encourage them to enter the business world and provide young people with skills that enable them to become productive members of society. It also aims to create a positive impression on the Syrian society towards working in the business world and establishing small projects.

SHABAB Project aims to providing practical training and career advice to university students to improve future employment prospects. The training courses range from the rules of conducting job interviews and writing a CV or enhancing knowledge of the business environment and developing professional skills. Certified coaches and career advisors coach and guide students as they search for a job in the labour market or evaluate their career. While the courses for outstanding students who aspire to be pioneers focus on teaching the basic principles of business and helping them develop their own businesses. At present, the project operates within three clinics that work in three Syrian universities, and the project has so far succeeded in reaching 175,000 students.

THE RIGHT TO EDUCATION

The right to education is one of the basic universal rights of the human being. It is one of the goals that the education schedule supports and is expected for the year 2030 in order to achieve sustainable development aimed by the United Nations. It is a force that enables individuals to get rid of poverty and achieve individual and social well-being. It is something mandatory for the state, guaranteed by its own law, for all individuals without any form of discrimination. It is the right to education in all parts of the world that includes a number of freedoms and rights that individuals are entitled to. It is the right to have primary education for all, free of charge, the right to have secondary education available to everyone without exception, and in all its fields, whether technical, vocational, or training. Above all, it guarantees equal access to higher education without any distinction or discrimination, and ensures quality and meaningful education, whether in public or private schools and universities.

Education is the right for parents to choose freely appropriate schools for their children and enroll them in, regardless of their beliefs and religions. In addition, it is the right to freely establish any educational institution that adheres to the standards set by the government and the state regarding students and academic staff.

Education is of great importance because of its great role in building society, which is made up of all segments of teachers, leaders, politicians and others. Its importance lies in getting to know a new world. Through education, people get to know other cultures and worlds, and it helps to enhance understanding and communication between them, and open the horizon to knowledge of the great and their philosophies. It also helps in bringing fun and adventure by getting to know new things, interests and new people, without looking only at the subject of books and difficult exams. Through education, a person can get to know other people and build a social network and develop different life skills by applying what one learns in different aspects of economic, social or political life.

Here in Syria, the government is working hard to promote all these principles in society through free education and adopting new methods of teaching.

Read the article and answer the following questions.

1. What is expected to be achieved by the year 2030?

.....

2. How is education beneficial for individuals?

Grammar

Relative Clauses

Relative clauses provide descriptive information about a noun or noun phrase.

Relative pronouns are used to connect relative clauses to the main clause in a sentence.

1. People (who / whom / that)

Who and whom refer only to people. Who is the *subject* of the action while whom is the object.

e.g. The girl who is waving to us is my cousin.

Subject (girl = who = subject)

The guest speaker is the one to whom you should address the letter.

Object (guest speaker = to whom)

2. Possessions (whose)

Whose shows possession and usually refers to people or other living things.

e.g. The manager whose daughter is my friend spoke to us last night.

3. Things (which/ that)

That and which are used with things.

e.g. The bill that/ which you received last week needs to be paid tomorrow.

4. Places (where, which/ that+ preposition)

e.g. This is the house where I grew up.

This is the house which/ that I grew up in.

5. Times (when)

e.g. Saturday's the day when I tidy the flat.

Relative clauses can either be essential to the sentence (defining clauses) or non-essential (non-defining clauses).

Defining Clauses	Non-defining Clauses
<p>Defining clauses are clauses carrying essential information. Without it, a main clause will fail to convey the full meaning. Because of the necessity of their information, defining clauses are not set apart by commas:</p> <p>e.g. Here is the website which my sister created.</p>	<p>Non-defining clauses contain additional information to the main clause that, when taken away, doesn't affect the meaning of the sentence.</p> <p>Non-defining clauses require the use of commas to distinguish the additional information from the rest of the sentence.</p> <p>e.g. My cousin, who volunteers at a local homeless shelter, won the lottery.</p>

Note: *That* can only be used in defining relative clauses.

a Choose the correct pronoun in these sentences.

1. We have a package for the man (*who, which*) stopped by today.
2. I met the author (*who, whose*) book is on the best-seller list.
3. The income tax, (*that, which*) he paid last year, is accurate.
4. Will you be presenting the slides (*whose, which*) you took in Canada last summer?
5. This is the city in (*which, where*) Shakespeare was born.
6. The evening is a time (*when, where*) we can all relax.

b Combine each sentence by using a relative pronoun and eliminate the repeated words.

Example: Omar met a teacher. The teacher spoke Arabic.

Omar met a teacher who spoke Arabic.

1. Lubna bought a dress. The dress cost \$45. She had to return it.
2. Mrs. Duncan is talking to her students. The students' projects are due on Friday.
3. Sally introduced me to her sister. Her sister is a civil engineer.

4. Summer is the time of year. The weather is the hottest then.
5. We went to a café on Sunday. It was very nice.
6. Yesterday I ran into an old friend. I hadn't seen him for years.
7. I know a man. His last name is Goose.

 **C Complete the sentences with relative clauses.**

Example: Ali's the only one who knows the answer in our class.

1. I know someone
2. The courses I'm taking this term are more difficult than the ones
3. The teacher thanked the students

Unit 6

United
Nations

Reading

The United Nations Children's Fund (UNICEF), originally known as the United Nations International Children's Emergency Fund, is responsible for providing humanitarian and developmental aid to children worldwide and it has won the Nobel Prize, the first to be awarded to an organisation. Despite being highly active in fundraising, awareness, relief work and research, very few people know the origin of the organisation. UNICEF is supported entirely by the voluntary contributions of governments, non-governmental organisations, foundations, corporations and private individuals and receives no funding from the assessed dues of the United Nations. Most of the fundraising is done by UNICEF's 36 national committees, the voluntary support of millions of people around the world, partners in government, civil society and the private sector.

UNICEF was created in 1946 and began with a definite mission of providing emergency food and healthcare to children in the countries that had been destroyed by World War II. In 1953, Its original name was changed to the United Nation's Children Fund to reflect its broader mission, but it retained the original acronym, after being officially adopted as a permanent branch of the UN in 1954.

The agency is among the most widespread and recognisable social welfare organisations in the world. Though its headquarters are in New York City, it operates in over 190 countries, focusing on the welfare of children in at-risk areas. Since 2006, the organisation has concentrated on a few specific issues; child survival and development, basic education and gender equality, child protection and policy advocacy, and partnerships. UNICEF has been a key player in global

development work since its beginning. UNICEF operates during emergencies in addition to supporting developing countries to provide children with basic resources and advocate for their rights.

At last, UNICEF is working to create a world in which no child is ever bought or sold, stolen from a family or otherwise victimised. UNICEF believes that every child deserves to grow up in a loving family and it supports inter-country adoption when conducted ethically in accordance with prevailing law and best practices. At the same time, UNICEF works to support families in need so that no one ever feels forced by poverty or insecurity to give up a child.

Pronunciation

Word Stress with Two Syllables

There are two very simple rules about word stress:

1. One word has only one stress. (One word cannot have two stresses. If you hear two stresses, you hear two words.)
2. We can only stress vowels, not consonants.

In two-syllable words, nouns and adjectives are usually stressed on the first syllable. Two-syllable verbs are usually stressed on the second syllable.

- The word perfect, for example is a two-syllable word. If we stress the first syllable, it is an adjective which means (not having any mistakes)
e.g. Your homework is **PER-fect**.
- But if we stress the second syllable, it becomes a verb which means (to make something as good as you are able to).
e.g. We need to **per-FECT** our design .

R6.1 Listen to the teacher saying each sentence. Then capitalise the primary stressed syllable in the underlined word. Decide whether it is a *verb*, an *adjective* or a *noun*.

1. We need to increase our sales figures. (verb)
2. He's showed an increased interest in the project. ()
3. They import their goods from the UK. ()
4. This is a cheap import ()
5. The present city was founded in 944. ()
6. He's going to present his friend, Maher. ()
7. This is one of the rejects from the factory. ()
8. He rejected her advice. ()

Grammar

Future Forms

We can talk about future time with different verb forms:

1. Will or won't

We use *will* for predictions or an immediate decision

e.g. One day people *will* travel to Mars.

"Anything to drink, sir?" - "I'll just have a glass of water, please."

2. Be going to:

We use *be going to* for actions that we have decided or intended to do before we speak:

e.g. I'm going to clean my room this afternoon. (I decided to clean it this morning.)

3. Present Simple

We use the *Present Simple* with a future meaning:

- to talk about timetable or schedules:

e.g. The train to the airport *leaves* in 20 minutes.

- after conjunctions such as *when*, *as soon as*, *after*, *before*, *until*, *as long as*:

e.g. Can you write the report *before* we *hold* the meeting? (not before we will hold the meeting)

4. Present Continuous

We use the *Present Continuous* to talk about things we have arranged in the past to do in the future.

e.g. A bank wrote to Steven and asked him to start work next week.

He's starting a new job next week.

5. Be about to

We use *about to* to talk about something likely to happen in the immediate future:

e.g. I'm *about to* go to Rome for a conference. (I will be leaving soon.)

6. Future Continuous

will / won't be + verb + -ing

We use the *Future Continuous*

- to decide or predict events continuing over a period of time in the future:

e.g. I'll *be working* on the report all next week.

- to ask about someone's plans:

e.g. How long *will you be using* this computer?

7. Future Perfect

will / won't have + past participle

We use the *Future Perfect* to talk about a future event that will finish before a specific time in the future, often with *before*, *by + fixed time*, or *in + amount of time*:

e.g. By the end of the year, I *will have given* the same talk at 6 conferences!

In a week's time, I'll *have written* the report.

a

In six of these sentences there is a verb in the wrong tense. Underline each mistake and write the correction.

1. When I'll find the answer, I'll let you know. *I find*
2. My exams finish on 27th June.
3. I'll be fine in the interview as long as they won't ask me technical questions.
4. What time is your meeting about to start tomorrow?
5. I'll hand in my notice for this job after I'll get the contract for my new one.
6. I'll text you before we set off.
7. The bus doesn't arrive until 7.30 in the evening.
8. I've got my schedule for the Japan trip. We're about to fly to Tokyo at 10 a.m. on Monday, and then travel by train to Kyoto for one night.
9. The moment I'll receive my results I'll phone you.

b

Complete the text with *will be*, *will have* or *will have been* + the correct form of the verb in brackets.

What are your hopes for the future?

1. It's hard to make predictions too far into the future, but I think I can say quite a lot about my life in about ten years. I think I (*still live*) will still be living in the same city. By that time, I ¹ (*finish*) my studies, and, who knows, perhaps I ² (*find*) a good job. And I ³ (*probably go out*) with the same friends too!
2. By the time I'm sixty, I expect that nearly everything ⁴ (*change*) and everyone ⁵ (*try*) their best to adapt to new circumstances. For example, I can't imagine that we ⁶ (*use*) cars, because by then most of the oil in the world ⁷ (*run out*) People ⁸ (*travel*) in electric cars, or perhaps we ⁹ (*walk*) everywhere. I hope that scientists ¹⁰ (*solve*) pollution problem, but who knows! Perhaps some other worse problems ¹¹ (*come*) along by then!

Everyday English *Modesty*

Put the following sentences in the correct order to make a meaningful dialogue.

A: I've never seen such an attractive and talented class of children. I think you, as their teacher, deserve the highest praise. 1

B: Oh no. They're a splendid group of young people. I don't deserve any of the credit. 2

A: Oh, come on. It can't have been easy, and I don't agree that anyone could have done it.

B: That had really nothing to do with me. They suggested it in the first place.

A: Perhaps they did, but you gave them the idea in the first place, didn't you?

And that project for helping old people is the finest thing I've seen for years.

B: I had very little to do with it. The children contributed lots of ideas themselves.

A: I'm sorry, I just can't believe it had nothing to do with you. And, even if they had the original idea, I'm sure you guided them in how to organise it.

B: You're very kind but it wasn't difficult at all. Anyone could have done it.

A: I'm sure they are splendid, but I don't agree that you don't deserve any credit.
I know for sure that you planned the lovely decorations in their classroom.

Antibiotics

Antibiotics are powerful medicines used to fight a wide variety of infections or diseases caused by bacteria in people and animals. Antibiotics work to kill the bacteria or stop them from multiplying. Before bacteria can **multiply** and cause **symptoms**, the immune system can typically kill them. Sometimes, however, the number of harmful bacteria is **excessive**, and the immune system can't fight all. At that point, antibiotics are urgently needed.

Different antibiotics work against different types of bacteria; antibiotics that stop bacteria from multiplying and affect a wide range of bacteria are called broad spectrum antibiotics like amoxicillin and gentamicin, whereas antibiotics that kill bacteria and affect only a few types of bacteria are called narrow spectrum antibiotics such as penicillin.

Some people may develop an **allergic** reaction to antibiotics, especially penicillin. Side effects might include rash, swelling of the tongue and face, and difficulty in breathing. Allergic reactions to antibiotics might be immediate or delayed. People with reduced liver or kidney function should be **cautious** when using antibiotics. This may affect the types of antibiotics they can use or the dose they receive.

Medical professionals have concerns that people are overusing antibiotics. The more often antibiotics are used or taken incorrectly, the more chance bacteria have to change and become resistant to them. This can make bacterial infections much harder to treat. Patients should complete the whole course of medication to prevent the return of the infection.

The world needs to change the way it prescribes and uses antibiotics. Even if new medicines are developed, without behaviour change, antibiotics **resistance** will remain a major threat. Behaviour changes must include actions to reduce the spread of infections through vaccination, hand washing and food hygiene.

a Answer the following questions.

1. What is the function of antibiotics and how is it fulfilled?

.....

2. What happens if the immune system can't kill all bacteria?

.....

3. What kinds of antibiotics are mentioned in the text?

How does the Immune System Work?

The immune system has a vital role since it protects your body from harmful substances, germs and cell changes that could make you ill. It is made up of various organs, cells and proteins.

As long as your immune system is running smoothly, you don't notice that it's there. But if it stops working properly – because it's weak or can't fight particularly aggressive germs – you get ill. Germs that your body has never encountered before are also likely to make you ill. Some germs will only make you ill the first time you come into contact with them. These include childhood diseases like chickenpox.

The task of the immune system

Without an immune system, we would have no way to fight harmful things that enter our body from the outside or harmful changes that occur inside our body. The main tasks of the body's immune system are:

- to fight disease-causing germs (pathogens) like bacteria, viruses, parasites or fungi, and to remove them from the body.
- to recognize and neutralize harmful substances from the environment.
- to fight disease-causing changes in the body, such as cancer cells.

How is the immune system activated?

The immune system can be activated by a lot of different things that the body doesn't recognize as its own. These are called antigens. Examples of antigens include the proteins on the surfaces of bacteria, and viruses. When these antigens attach to special receptors on the immune cells (immune system cells), a whole series of processes are triggered in the body. Once the body has come into contact with a disease-causing germ for the first time, it usually stores information about the germ and how to fight it. Then, if it comes into contact with the germ again, it recognizes the germ straight away and can start fighting it faster.

b Answer the following questions.

1. Why is the immune system so important?
2. What does the immune system consist of?
3. What happens when the immune system is unable to work?
4. Mention one task of the immune system.
5. What helps the body to fight germs more quickly?

Grammar Expressing Wishes

We use *wish* and *if only* to talk about things that we would like to be different either in the present or the past. *If only* is usually a bit stronger than *wish*.

- **Wish in the present:** *I wish + subject + past simple*

We use "*I wish + subject + past simple*" to express a regret about a present situation.

N.B. "*were*" is often used instead of "*was*" with I, he, she and it (formal).

e.g. I wish I *were* rich. OR I wish I *was* rich.

- **Wish in the past:** *I wish + subject + past perfect*.

We use "*I wish + subject + past perfect*" to express a regret about a past situation.

e.g. Michel didn't revise his lessons for the exam.

Michel: *I wish I had revised my lessons.*

- **Wish in the future:** *I wish + subject + would + infinitive*

We use "*I wish + subject + would + infinitive*" to express annoyance or a desire for change in the near future.

e.g. James is a heavy smoker. His wife wants him to stop smoking.

I wish James would stop smoking.

The Inspiration of Civil Rights' Movements

Gandhi¹..... born in India in 1869. At that time, India was a part of the British Empire and at the age of 18, he travelled to London to study law. At the age of 24, Gandhi went to South Africa²..... he witnessed the racial discrimination.

The biggest turning point in young Gandhi's life was on June 7, 1893, when he was thrown off a train station by a white man³..... he refused to move to a back seat. That would prove to be Gandhi's first, but certainly not last, act of civil disobedience.

By 1906, Gandhi had organised his first civil disobedience campaign in South Africa. He would spend the next 9 years fighting for Indian rights in the country before returning home to fight for Indian independence. Over the years Gandhi would become a leading figure in the independence movement. After years of struggle and many arrests, Gandhi's "Quit India" movement in 1942 paved⁴..... way for Britain's eventual withdrawal from the country.

Today, Gandhi is remembered for his commitment to nonviolence, peaceful protest⁵..... simple living. He inspired millions of people to action, preaching a message of love, tolerance and avoiding greed.

Syrian Nationality Law

Nationality Law is the law governing the acquisition, transmission and loss of Syrian citizenship. Syrian citizenship is the status of being a citizen of the Syrian Arab Republic and it can be obtained by birth or naturalisation. The Syrian Nationality Law was enacted in 1969, by Legislative Decree 276.

Nationality at birth

The Syrian nationality is determined predominantly by paternity (father). The place of birth is irrelevant, and being born in Syria does not grant an automatic right to Syrian nationality. Birth to a Syrian mother does not automatically confer nationality. If a Syrian woman marries a foreign husband, their children will have the foreign husband's nationality and have no claim to Syrian nationality, even if they were born and raised in Syria. The legal ramifications are that these persons face a number of obstacles, one of which is their inability to work in the public sector. It is also harder and more restrictive for foreigners to own real estate in Syria.

Naturalisation

The other way to acquire Syrian nationality is through naturalisation. Non-nationals who have resided in the country for over 5 years and fulfilled a number of other requirements can apply for naturalisation. The requirements are eased for individuals from another Arab country, such as the requirement to be able to speak and read Arabic fluently.

A foreign woman who marries a Syrian man can naturalise on the basis of that marriage, but a foreign husband cannot acquire Syrian citizenship on the basis of marriage to a Syrian wife.

b

Answer the following questions about the text.

1. Define the Syrian Nationality Law.

.....

2. How can Syrian nationality be obtained?

.....

3. What is the Syrian nationality determined by at birth?

Culture Shock

Reading

a

Check the words in **bold** below in your dictionary.

Did you know

- *Sirop d'érable (Maple syrup) is made from the sap of maple trees.*
- *The Canadian province Quebec is the largest producer, responsible for 70% of the world's output of maple syrup.*
- *Maple syrup production farm is called Sugar shack.*
- *The maple leaf has come to symbolise Canada, and is depicted on the country's flag.*

Diana, a student from Aleppo, Syria, is studying in Montreal. The following passages are taken from her diary during her first six months in Canada.

February 17

Moving to a country with a very different climate could be a challenge! In Syria we have a Mediterranean weather, with mild, rainy winters. Here in Canada winter is very cold and snowy. Temperature average is between the single digits and the -20s. I was very worried about the cold. But it wasn't a problem because most buildings here are well heated. Actually this city knows how to stay warm. When the weather gets too chilly, I head to the Underground City – a series of interconnected tunnels beneath Montreal which run for over 32 kms. The tunnels connect shopping malls, universities, banks and seven metro stations.

April 10

I miss my mom's cooking a lot, the food here is delicious but it's not really the same. Foods, typically considered national dishes of Canada, include poutine, Montreal **bagels** and butter tarts. My most amazing experience was Sugar time, usually at the end of March. It is the season when **maple** syrup is produced, and some parties are organised in "la cabane à sucre", a place where maple **sap** is boiled to produce maple syrup. It is heated above

100 degrees, and the drops are placed on the snow. It becomes like a candy, a caramel that is served on a stick!

July 31

Getting used to different culture is difficult. My experience during these six months taught me to avoid quick judgements and try to understand the point of view of the people in another culture. I'm staying in a building with a **Quebecois** family who are teaching me about Montreal a lot. They told me not to make quick decisions, and not to leave right away even if I wanted to. They were right! People don't take the time to adapt, so they don't accept the new culture and just go back.

- b** Do the following statements agree with the information given in the text?
Write *True* if the statement agrees with the information, *False* if the statement contradicts the information or *Not Given* if there is no information on this.

	True	False	Not given
1. Diana wears heavy clothes when it is very cold in Canada.			
2. In Canada, people can go shopping underground.			
3. Montreal has been a destination for many immigrants.			
4. Maple syrup is prepared in Canada around the year.			
5. The people Diana lived with taught her to take more time when making decisions.			

- c** Add the missing prepositions. Look back at the text, if necessary.

1. move
2. worry
3. head
4. organise
5. stay

- d** What do you do to avoid culture shock in Diana's opinion?

Now write down other solutions to help Diana.

Tips to face culture shock

Grammar

Modals (obligation/ lack of obligation)

	Modal Verb	Use	Example
Affirmative	must	Obligation comes from <i>speaker</i> . We use it for written rules and instructions and giving opinions and saying what is necessary.	- <i>Passengers must fasten their seat belts.</i> (The obligation is imposed by the airline who wrote the notice.) - <i>I haven't spoken to Sandra for ages. I must call her.</i>
	have to	Obligation comes from <i>outside</i>	<i>We have to get up early tomorrow to catch the plane.</i> (The time of the plane is the reason for the obligation)
	should	Advice or recommendations	- <i>You should apologise to the boss for being late.</i> (advice) - <i>You should get a good map of London before you go there.</i> (recommendation)
Negative	mustn't	mustn't is not the same as don't have to mustn't = prohibition	<i>You mustn't wait here.</i> (You are not allowed to wait here) = negative obligation
	don't/ doesn't have to	don't/ doesn't have to = absence of necessity = there is no need to do this	<i>You don't have to wait here.</i> (It is not necessary for you to wait here, but you can if you want to) = no obligation
	shouldn't	To advise not to do something, usually because it is bad or wrong	<i>You shouldn't smoke.</i>

Past Form

1. To express obligation in the past, use had to:

I had to report the incident to the police.

Did you have to get a visa?

2. To criticise actions in the past, use should + perfect infinitive. Should in the past means that the subject did not do the right thing.

I should have stayed at home. (= I didn't stay at home and my behaviour was wrong.)

3. Must + perfect infinitive is not used to talk about past obligation. It is used to make deductions about the past.

She must have left early.

a Say two things you must do, two things you should do and two things you have to do.

1.
2.

Miranda: No, but ⁽²⁾ *you must / you have* to dress smartly. You can't wear jeans.

Chris: ⁽³⁾ *Should I / Must I* take my laptop computer with me?

Miranda: No, ⁽⁴⁾ *you mustn't / you don't have to!* You have to write all your essays by hand!

Chris: What? I ⁽⁵⁾ *have to / don't have to* use email!

Miranda: No, I'm afraid not. Carstairs is very old-fashioned. Anyway, when are you leaving?

Chris: I don't get a ticket for the train this evening. ⁽⁶⁾ *I should have reserved / I must have reserved* a seat, though. ⁽⁷⁾ *I should / have to* stand all the way to Scotland.

Miranda: ⁽⁸⁾ *Should I / Must I* give you a ring later and see how things are going?

Chris: Sure. Oh, another thing; can I use my mobile phone at college?

Miranda: Yes, don't worry. But ⁽⁹⁾ *you should / you must* switch it off during the school day.

Chris: Ok. Can you give me any more advice?

Miranda: Yes. You ⁽¹⁰⁾ *must / should* visit the lake near the collage. It's beautiful.

Robots

The word "robot" stems from the Czech "robotnik" which means a "slave". Man has built a robot after his/her image. Possibly, that is why human beings have a variety of strong emotions, both negative and positive towards robots.

The relative advantage of robots and intelligent machines is accompanied with their ability to play a range of movements and thinking endlessly and tirelessly. When designing robots, it is essential for planners to focus on the robots' ability to follow patterns. Due to this engineering reality, robots are certainly specialised in the first step. Another complicated sort is the generalised robot, which can to some extent imitate humans. In the future, the memory of robots is expected to become very extensive. This will allow huge amounts of data storage, the thing which will be reflected in the robot's ability to fulfil a lot of operational tasks. Consequently, the use of robotics will be expanded.

Robots offer people a helping hand to focus on the creative process when relying on such intelligent machines to take care of unpleasant physical and mechanical work. The greatest benefits of robots should mean for people staying away from unhealthy environments, such as mines and deep waters. For many industrial countries, using robots could increase production with low costs. The third domain for robots would be doing productive activities that people cannot easily perform.

At present, the main challenge of robotisation is in combining human and robot activities, trying to find the best human-robot match. Meanwhile, robots have the ability to do heavy-duty jobs with accuracy and repeatability, human beings have the privilege of creativity, flexibility, decision-making and adaptability. When experts reach high degree of co-operation, manufacturers would enhance efficiency and capacity, as well as improve quality and industrial working conditions.

Motivational influences of robotics among workers and managers can be amazing. This issue has been recognised in the medical sector in some empirical operations despite the fact that the use of robotics in risky tasks need special attention from safety and health experts. As the modern world is eager to witness all that is innovative, intellectual and smart, there is an urgent need to eliminate the negative side-effects of new robot applications and that is the key challenge in ongoing technological transition period.

b Read the text and answer the following questions.

1. Why do people consider robots both friends and enemies?
2. What is the crucial thing for designers to pay close attention to?
3. How is the generalised robot different?
4. What will happen when people depend on intelligent machines?
5. In which ways are humans superior to robots?

c Read the text again, then decide whether the following statements are *True* or *False*. Correct the false ones.

1. The Czech word "robotnik" is the origin of " robot".

.....

2. The use of robotics will be expanded in the future because of the robots' specialisation.

.....

3. Working in mines and deep waters are the things that humans are forced to do in the future.

.....

4. Robots will make production process quicker and at a low cost.

.....

5. Accuracy and repeatability are the main features of man-made production.

Unit 12

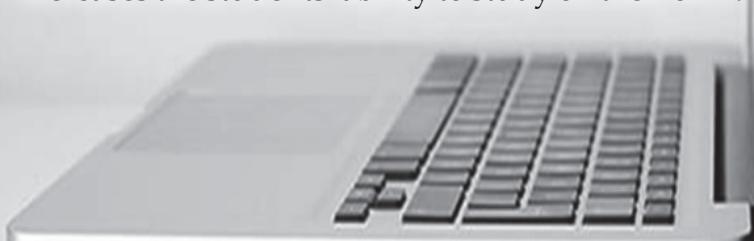

Digital Literacy

Reading

E-learning is the use of networked information and communication technology in teaching and learning. It combines all educational activities that are carried out by individuals or groups working online or offline, and on networked or separate computers and other electronic devices.

E-learning is highly interactive and relies heavily upon graphics, video, and audio. However, there are often simulations to support learning achievement, which could include 3D components. New software training is an example of a course that often includes a high degree of interactivity and simulations.

The impact of e-learning is noticed in self-responsibility among students when they decide to study or not. It helps expand their knowledge by researching using the World Wide Web. Teachers allow them to acquire various computer skills and apply their knowledge and skills. This helps in the communication with their students at all times and increases the students' ability to study on their own.

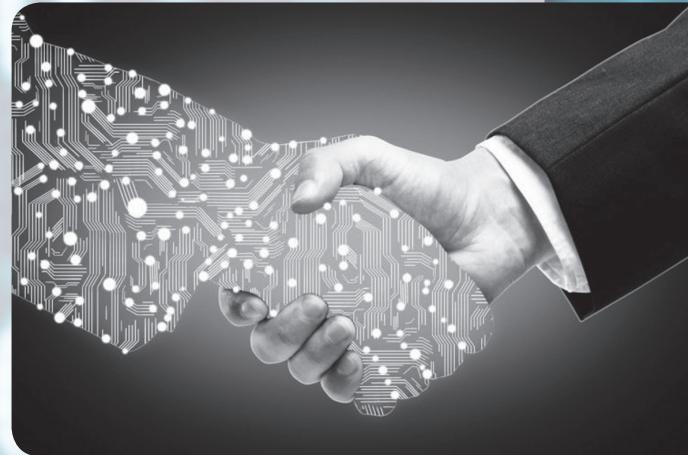

The importance of e-learning lies in the fact that the students need to be busy with what they are doing to improve learning outcomes. E-learning enables students to become thinkers, learners and risk takers in a protected environment, so they need not rely on the teachers, as they can be independent. Learning can happen anywhere, anytime and anyhow. It encourages students to seek more from school. When the course is developed, it can be run as many times, at as many locations and for as many learners and thus it reduces the general cost and time.

As the digital revolution has led to remarkable changes in how the content is accessed, consumed, discussed, and shared, e-learning is best suited for everyone especially at weekends or evenings. Besides, content of lessons can be accessed at an unlimited number of times: at the time of revision and when preparing for an exam.

The chief benefit of learning online is that you are in harmonisation with modern learners by accessing updated content whenever they want it. E-learning provides a quick delivery of lessons, so the learning time is reduced as the student does not need to travel to the training venue. You can learn comfortably from your own place. Besides, e-learning is cost effective compared to traditional forms of learning because learning through this mode happens quickly and easily and a lot of training time is reduced regarding trainers, travel, course materials, and accommodation. Recently such type of learning has become popular in Syria, especially after applying it at Syrian Virtual University.

On the other hand, if an individual lacks self-discipline, they will not be motivated to study bringing about delay. This is where traditional classroom learning is convenient whereby; you are followed if you are falling behind in your studies. In addition, health problems normally occur when an individual is always on his/her computer or tablet; it brings about straining problems, poor vision and the like.

To sum-up, e-learning provides the students with the ability to fit learning around their lifestyles, effectively allowing even the busiest person to promote a career and gain new qualifications. Some of the most important developments in education have happened since the launch of the Internet. Nowadays learners are well acquainted with the use of smart phones, messaging and using the Internet so contributing in and running an online course has become a simple affair.

a Match the words with their meanings.

- | | |
|------------------|---|
| 1. interactive | a. an event to celebrate something new |
| 2. simulation | b. a place to stay when you are travelling |
| 3. acquire | c. that allows information to be passed continuously in both directions between the computer and user |
| 4. harmonisation | d. the ability to control yourself or other people, even in difficult situations |
| 5. accommodation | e. the technique of representing the real world by a computer |
| 6. discipline | f. to encourage people to like, buy, use, do, or support something |
| 7. promote | g. to get or buy something |
| 8. launch | h. the act of making different people, plans, situations, etc. suitable for each other |

b Answer these questions about the text.

1. How can e-learning be applied?

.....

2. What is necessary to ensure interactivity and simulations?

.....

3. How can teachers and students interact when using e-learning?

.....

4. What can the students do without their teachers?

.....

5. Name some bad effects of e-learning.

.....

6. What facilitates a course online?

.....

c Are these statements True or False?

1. E-learning allows students to have direct interaction.
2. E-learning promotes computer skills and have self-learning.
3. Traditional learning is cheaper than e-learning.
4. One disadvantage of e-learning is that it needs more time and can be applied in one place.
5. When running an online course, you have to be free of any responsibility.

6. The plane to London will take off at eleven o'clock.

c R12.2 Listen and check.

Grammar

Inversion

In statements, the verb usually follows the subject:

e.g. Mary missed her lessons last week.

Sometimes we invert the subject and verb so that the verb comes before the subject.

We use inversion:

- after *so/ neither/ nor*:
- e.g. A: I didn't know there was a library here. B: *Neither/ nor did I.*
- in the phrases *Here come/comes + noun* and *There goes/ go + noun*:

We can't use inversion when we use pronouns with *Here come(s)* or *There go(es)*:

e.g. *Here comes* the professor.

Here they come, not *Here come they.*

- in question tags:
e.g. We have to wear formal clothes, *don't we?*
- When we begin a sentence with a *limiting adverbial* (e.g. rarely) or a *negative adverbial* (e.g. not only), the subject and the auxiliary verb are inverted:
e.g. *Hardly ever does he come to work on time.*
- When using inversion with *Present Simple* and *Past Simple*, the subject must agree with the auxiliary not the main verb:
e.g. *Not only was Jack famous for helping people, but he was also the first man to establish a charity in his country.*

Note: We do not put the verb before the subject:

- when we include a *question in another question*.(indirect questions)
e.g. *Where are my glasses? ➔ Have you any idea where my glasses are?*
- when we include a question in another sentence:
e.g. *I wonder what his lifestyle like.*
- when we use a question word to introduce a relative clause in phrases:
e.g. *I wonder why he was sad.*
- in indirect speech. We use if when we report a yes/ no question.
e.g. *Have you been to Canada before? He asked me if I had been to Canada before.*

a Choose the correct answer.

1. Rarely anyone using carriages nowadays.
a. you see b. will you see c. you will see d. you have seen
2. Only after he travelled to London to study.
a. he graduated b. he had graduated c. did he graduate d. he has graduated
3. Have you any idea where Sami?
a. can I meet b. I can meet c. do I meet d. have I met
4. My mother asked me if my aunt.
a. had I visited b. I had visited c. I will visit d. will I visit
5. There to hold a meeting.
a. goes he b. he goes c. went he d. he went

b Use the words in brackets to complete each sentence. Put the verbs in the correct form.

1. (*Never/I/meet*) such well-behaved children before.
They are as good as gold.
2. (*No sooner/my brother/sit down*) to dinner than there was a knock on the door.
3. (*Seldom/we/read*) newspapers nowadays.

2. What's the difference between the traditional book and e-book?
3. What are the advantages of e-books in comparison with the printed books?

Writing

Write an essay of no more than 120 words about the arguments for or against e-learning at school. Make sure you give your opinion.

Take these hints into your consideration:

In an article with arguments **for and against** a subject, we usually give a **balanced argument**. We use a formal style and divide our article into four paragraphs.

- In the **introduction**, we make general remarks about the subject, *without giving our opinion*.
- In the **second** paragraph, we give the **advantages** with examples.
- In the **third** paragraph, we give the **disadvantages** with examples.
- In the **conclusion**, we **sum up** the subject *stating our own opinion clearly*.

We can use expressions such as *I think, I believe, In my opinion*, etc to express our opinion and **linking words** (*as, because, for example, however, etc*) to join ideas.

Progress Test 3

Reading

Body Language

Communication between people can be verbal by using a language to speak to others, or non-verbal by using the body language such as gestures or facial expressions. People in different parts of the world use different gestures to communicate non-verbally and these gestures may have different meanings from one place to another. Handshaking, for instance, is considered common around the world. However, to shake hands with others while greeting is something accepted and favourable in Western culture and expresses confidence, while people in the Far East, in Japan for example, do not prefer shaking hands strongly. This can be interpreted as aggressive; they bow instead.

Talking about facial expressions, they are mostly considered to be universal and they are accepted and known widely. Expressing happiness, sadness, surprise, fear, disgust and anger are the same all over the world. Eye contact is another non-verbal language. For example, looking away while a person is talking to you means that you are not interested. Avoiding eye contact is a sign of respect for bosses and elders in many parts of the world. Understanding even a few gestures from different cultures can make you a good communicator. So, next time when you travel, try to be culturally sensitive. Learn about the local gestures and let your body talk.

a Answer the following questions. (6 marks)

1. What are the kinds of communication?

Appendix I

Parts of Speech

- 1. Nouns:** A noun is the name of a person, place, thing, or idea.
- 2. Pronouns:** A pronoun takes the place of a noun in a sentence.
- 3. Verbs:** A verb tells what action someone or something is doing or expresses a state of being.
- 4. Adjectives:** An adjective describes a noun or a pronoun. It tells what kind, how many, or which one.
- 5. Articles:** the words *a*, *an* and *the* are special adjectives called articles. An article is used before a noun.
- 6. Adverbs:** An adverb describes a verb, adjective, or adverb. It tells how, when, where, or to what extent.
- 7. Prepositions:** a preposition describes a relationship between a noun or pronoun and another word in the sentence.
- 8. Conjunctions:** A conjunction joins words or phrases in a sentence.
- 9. Interjections:** An interjection is a word or a phrase that expresses a strong feeling or emotion.

Appendix II

Punctuation Rules

Full Stop (.): This is the most popular punctuation mark because you simply cannot write even a single sentence without using it. So, there are two most common uses of a full stop: to indicate the end of a sentence, or to follow an abbreviation.

Comma (,): A comma is often used to separate different ideas in a sentence. However, it has many other uses as well, and it is important to remember them as well.

Question Mark (?): A question mark, as its name suggests, needs to go at the end of every interrogative sentence instead of a full stop.

Exclamation Mark (!): An Exclamation mark added at the end of a sentence shows emphasis. Depending on the meaning of the sentence, it can indicate anger, happiness, excitement, or any other strong emotion.

Quotation Marks (" "): As their name suggests, quotation marks indicate direct quotations. You can also use them to show that a word or a phrase is being used ironically or for titles of articles, book chapters, episodes of a TV- show, etc.

Apostrophe ('): An apostrophe has two very important uses. Firstly, it can be used in contractions in place of omitted letters. Secondly, it can show possession.

Hyphen (-): Even though it looks very similar to a dash, a hyphen has very different uses. It is commonly used to create compound words.

Dash (–): There are two different dashes, the en dash and the em dash, the first being slightly shorter than the second one. The en dash is usually used to show a connection between two things, as well as a range of numbers, years, pages, etc.

Colon (:): A colon is a punctuation mark you will come across very often in different circumstances. It can introduce an example, a list, an explanation, or a quotation. Or, you can also use it to emphasize a certain point.

Semicolon (;): A semicolon is a punctuation mark that creates a longer pause than a comma but a shorter pause than a full stop. So, it can be used to create a pause between two independent clauses that are still closely related to each other.

Parentheses (()): In most cases, you will see additional information in parentheses. Usually, it can be omitted without creating any confusion for the reader.

Brackets ([]): Brackets are, in a way, similar to parentheses. However, they are mostly used in academic writing and when presenting quotes. For instance, the writer can add extra information or fix mistakes in brackets, without changing the original quotation.

Ellipsis (...): An ellipsis creates an intriguing and mysterious atmosphere in the text. In addition, it can be used to show that some letters or even words are omitted.

Slash (/): You might need to write a fraction, a measurement, or to suggest alternatives in your text. There are just three of the instances where you will have to use a slash.

Appendix III

Writing Process

Writing is a form of communication that allows students to put their feelings and ideas on paper, to organise their knowledge and beliefs into convincing arguments, and to convey meaning through well-constructed text. In its most advanced form, written expression can be as vivid as a work of art.

Writing process, as a classroom activity, incorporates the four basic writing stages:

Let's explore each one of them

1. Planning

Pre-writing is any type of activity that encourages learners to write. Before you start writing, consider the following things:

1. Make sure you understand the type of essay you are about to write.
2. Decide the topic you will write about and narrow it down.
3. Consider your audience.
4. List some sources that cover information about your topic.
5. Learn as much as you can about the topic you are going to write about.

The following activities will help you gather as many ideas as you can, ideas that will be used in the drafting stage.

Group Brainstorming:

- Group member share ideas about a particular topic and spontaneity is the most important factor since there are no right or wrong answers.
- All ideas are welcome in this stage.

Rapid Free Writing:

- Students write as much as they can about a topic during 1 or 2 minutes. Student write freely and quickly single words and phrases about a specific topic.

Wh- Questions:

- Students generate who, why, what, where, when and how questions about a topic. Students can gather information from different sources to answer the questions they generate.

2. Drafting

- Once enough ideas are gathered during the planning stage, the first attempt at writing is *drafting*.
- In this stage, authors of a piece of writing focuss on writing fluently rather than focusing on accuracy or the neatness of the draft.
- Writers usually take into account the readers since that can dictate a certain style to be used.
- Before moving to the revision stage, learners usually receive feedback from instructors. This feedback can be oral or in writing.

3. Revising

Students should revise their draft based on the feedback given in the responding stage. They reexamined what was written and see how effective they were at communicating their ideas.

Revising is not only checking for language errors, it is done to improve the global content and organisation of ideas.

You can do the following things during this stage:

1. Rearrange words, sentences or paragraphs.
2. Take out or add parts.
3. Do more research if you think you need to
4. Replace overused words.
5. Read your text aloud to make sure it flows smoothly.

4. Editing

A good writer must learn how to evaluate their own language through checking their own text looking for errors.

Learners can also interchange text with peers, it is common for writers to ask friends and colleagues to check texts for spelling, etc.

Don't submit your writing before checking these points:

1. Correct Spelling
2. Capitalisation
3. Punctuation
4. Unclear words that need to be changed
5. Appropriate style or formatting.

a. How to write a paragraph

1. **Introduction / Topic Sentence:** a paragraph has a TOPIC SENTENCE to answer directly the question or prompt.
2. **Support or explanation:** it USUALLY has 3-5 sentences to explain, give reasons for, tell more about, or prove your answer.
3. **Conclusion:** it has a concluding sentence "clincher" to finish the paragraph.

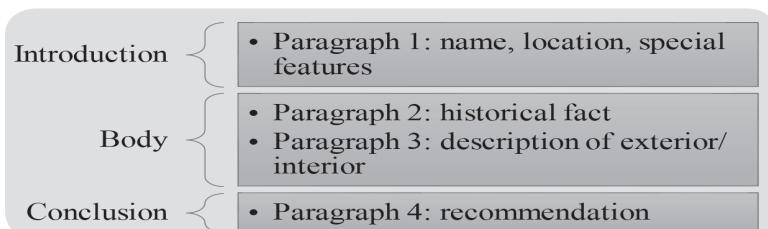

Remember

- A paragraph is ABOUT 1 SUBJECT. - A paragraph is INDENTED.

b. How to write an article about a famous building

When we want to write an article about a famous building, we follow these tips:

1. In the **introduction**, we mention what type of building it is, its location and its special features.
2. In the **body**, we give historical facts about the building (who designed it, when it was built, etc.). Then we describe the exterior and the interior of the building.
3. In the **conclusion**, we write general remarks about the building and a recommendation to visitors.
4. We use **past tenses** to write about historical facts and present tenses to describe the building, its location, etc.

How to Prepare a Presentation

An effective presentation is more than just standing up and giving information. A presenter must consider how best to communicate the information to the audience. Use these tips to create a presentation that is both informative and interesting:

1. Organize your thoughts. Start with an outline and develop good transitions between sections.
2. Have a strong opening. Why should the audience listen to you? One good way to get their attention is to start with a question, whether or not you expect an answer.
3. Define terms early. If you are using terms that may be new to the audience, introduce them early in your presentation. Once audience gets lost in unfamiliar terminology, it is extremely difficult to get them back on track.
4. Finish with a bang. Find one or two sentences that sum up the importance of your research. How is the world better off as a result of what you have done?
5. Design PowerPoint slides to introduce important information. Consider doing a presentation without PowerPoint. Then consider which points you cannot make without slides. Create only those slides that are necessary to improve your communication with the audience.
6. Time yourself. Do not wait until the last minute to time your presentation. You only have 5 minutes to speak, so you want to know, as soon as possible, if you are close to that limit.
7. Create effective notes for yourself. Have notes that you can read. Do not write out your entire talk; use an outline or other brief reminders of what you want to say. Make sure the text on slides is large enough that you can read it from a distance.
8. Practice, practice, practice. The more you practice your presentation, the more comfortable you will be in front of the audience. Practice in front of a friend or two and ask for their feedback. Record yourself and listen to it critically. Make it better and do it again.

Appendix V

Irregular Verbs

- Several of the most frequent verbs in the English language have irregular forms in the past. It is not difficult to learn these forms once you know the simple rules. The verbs are divided into eight sections for this purpose.
- In sections 8 & 4, the past and past participle forms are always different from each other. In all other sections (except section 1), the past participle form is always identical with the past.
- These patterns are based on pronunciation. Occasionally sounds change where spelling does not, or vice versa; we have indicated the pronunciation where necessary.

1. Essential verbs (no particular pattern)

Grammar Bank

Present Simple

+ V1/ V1 + s,es,ies	- I study law. -She likes reading. -He studies law.
- don't/ doesn't + V0	- He doesn't study medicine.
? do/ does + V0?	- Does he study law?

We use the Present Simple:

- to talk about regular habits or repeated actions:

e.g. *I use the Internet every day.*

(Words that describe how often or when are often used: *always, generally, normally, usually, often, sometimes, rarely, never, every day, every evening...*)

- to talk about facts or generally accepted truths:

e.g. *If you heat water to 100 °C, it boils.*

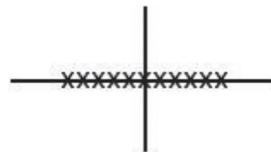

- to give instructions or directions:

e.g. *To start the programme, first click on the desktop.*

- to tell stories and talk about films, books and plays:

e.g. *In the film, the hero saves the villagers.*

simple present
I study every day.
(habitual action – past to present to future)

Present Continuous

+ am/ is/ are + V+ -ing	<i>He is studying French now.</i>
- am/ is/ are not + V+ -ing	<i>He is not studying French now.</i>
? am/ is/ are + V + -ing?	<i>Is he studying French now?</i>

We use the Present Continuous:

- to talk about temporary situations

e.g. *He's studying really hard for his exams.*

- to talk about actions happening at the moment:

e.g. *I'm waiting for my friends.*

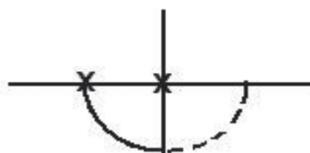

- to talk about trends or changing situations:

e.g. *The price of petrol is rising dramatically.*

- to talk about things that happen more often than expected, often to show envy or to criticise with words like *always, constantly, continually, forever*:

e.g. *My roommate's always throwing his cloths on the floor.*

present continuous
I am studying right now.
(action began in past, may continue into future)

State Verbs

The Present Continuous is not normally used with state verbs because the meaning of the verb itself is a general truth rather than something temporary. These verbs describe thoughts, feelings, senses, possessions and description.

Examples of state verbs:

- **thought:** believe, think, agree, disagree, remember, forget, suppose, understand, know.
e.g. *I assume he's too busy to help me.*
- **feelings:** like, love, hate, mind, prefer, want, enjoy, feel
e.g. *I prefer coffee to tea.*
- **senses:** feel, hear, see, smell, taste
e.g. *The pizza smells delicious.*
- **possessions:** have, own, belong
e.g. *My uncle owns a villa in Damascus countryside.*
- **description:** appear, look, look like, resemble, seem, sound
e.g. *He really looks like his father.*

Note:

Some state verbs can be used in the continuous form when the meaning is temporary.

e.g. *What are you thinking about? (now)*

I think you should tell the truth. (my opinion, not a temporary action)

Present Simple or Present Continuous

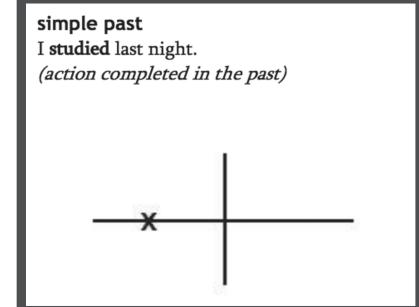

Present Simple	Present Continuous
We use the <i>Present Simple</i> to talk about facts/ things which are true at any time: e.g. Journalists <i>write</i> newspaper articles.	We use the <i>Present Continuous</i> to talk about actions in progress at the time of speaking: e.g. Look, the bus <i>is coming</i> .
We use the <i>Present Simple</i> for situations that exist over a long time, and for actions that are repeated. e.g. John <i>works</i> for an advertising company.	We use the <i>Present Continuous</i> for things that continue for a limited period of time around now. e.g. He's <i>living</i> in London.
We use the <i>Present Simple</i> with thinking and feeling verbs. e.g. I <i>don't know</i> which train to catch.	We don't usually use the <i>Present Continuous</i> with thinking and feeling verbs: I'm knowing someone who lives in London.
We use <i>have</i> in the <i>Present Simple</i> to talk about possessions. e.g. I <i>have</i> a red car. We use <i>think</i> in the <i>Present Simple</i> to express opinions: e.g. I <i>think</i> the situation will get better.	We use <i>have</i> and <i>think</i> in the <i>Present Continuous</i> to talk about actions: e.g. I'm <i>having fun</i> . I'm <i>thinking</i> about starting a new job.

Past Simple

+ V2	<i>She worked for the police.</i>
- did not + V0	<i>She didn't work for the police.</i>
? did + V0?	<i>Did she work for the police?</i>

We use the Past Simple:

- to talk about completed actions in the past. Often the time is mentioned.
e.g. Anna *passed* her exam last year.
- to give a series of actions in the order that they happened:
e.g. The robber *came* in through the window,
picked up the jewelry box, *emptied* it *out*
then *stole* all accessories.
(We often use words like *next* or *then* to indicate the sequence of events.)
- to talk about past repeated actions:
e.g. When her daughter *got* older, she often *went out* to visit her friends after school.
- to talk about long-term situations in the past which are no longer true:
e.g. My father *worked* for the police for over 15 years.

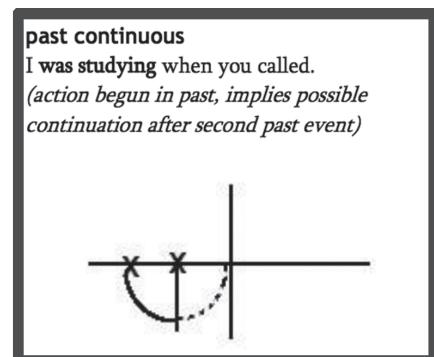

Past Continuous

+ was/ were + verb + -ing	<i>He was watching the news.</i>
- was/ were not + verb + -ing	<i>He wasn't watching the news.</i>
? was/ were + verb+ -ing?	<i>Was he watching the news?</i>

We use the Past Continuous:

- to provide the background scene to an action (usually in the Past Simple).
We often use words like *when*, *while*, and *as*:
e.g. The robbery happened at four o'clock while they *were sleeping*.
- to talk about a continuing action interrupted by a sudden past action:
e.g. While we *were getting* ready to go out, the rain suddenly stopped.

Past Simple or Past Continuous

Past Simple	Past Continuous
We use the <i>Past Simple</i> for a complete action in the past. e.g. The spaceship <i>flew</i> away.	We use the <i>Past Continuous</i> for an action that we were in the middle of. e.g. We <i>were driving</i> home. (We were in the middle of our journey.)
We can use the <i>Past Simple</i> for states. e.g. The spaceship <i>seemed</i> very big.	We don't normally use the <i>Past Continuous</i> for states. I wasn't knowing

Present Perfect Simple

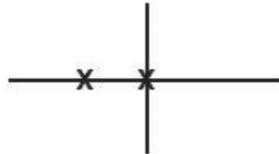

We use the *Present Perfect Simple* when we want to show a link between the present and the past.

+ - ?	has/ have + past participle has/ have not + past participle has/ have.....+ past participle?	<i>The aircraft has landed safely.</i> <i>The aircraft hasn't landed safely.</i> Has the aircraft landed safely?
--	--	---

We use the Present Perfect Simple:

- to talk about something that happened in the past, but we do not say exactly when it happened. The following time expressions are often used: *ever, never, before, up to now, so far.*
- to talk about something that happened in the past with a definite result in the present:
e.g. I've seen this film before. I don't want to see it again now.
- to talk about a present situation which started in the past, usually with *for/ since*:
e.g. He's worked for the same company since two years. (He's worked there till now)

present perfect
I have studied Chapter 1.
(past action with indefinite time span)

Present Perfect or Past Simple

Present Perfect	Past Simple
links the past with the present: e.g. <i>We've lived here for six years.</i> (We still live here.)	only talk about the past: e.g. <i>We lived there for six years.</i> (We don't live there now.)
doesn't talk about a specific time in the past: e.g. <i>Have you read 'The Old Man and the Sea'?</i>	States a specific past time: e.g. <i>I read "The Old Man and the Sea" last month.</i>

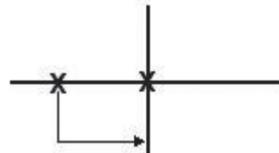

Present Perfect Continuous

+ has/ have been + Verb + -ing	<i>I've been studying really hard.</i>
- has/ have not been + Verb= -ing	<i>I haven't been studying really hard.</i>
? has/ have..... been + Verb= -ing	<i>Have you been studying really hard?</i>

We can use the Present Perfect Continuous:

- for an action over a period of time leading up to the present.
e.g. *I've been waiting here for thirty minutes.* (I'm still waiting.)
- to talk about repeated actions up to now.
e.g. *Carol has been playing the guitar since she was six.*
- to talk about an action which ends just before the present.
e.g. *He's been swimming.* That's why his hair is wet.

present perfect continuous
I have been studying for two hours.
(action began in past and continues until now)

Present Perfect Simple or Present Perfect Continuous

Present Perfect Continuous	Present Perfect Simple
emphasises <i>how long</i> : e.g. I've been cleaning the house for two hours.	says <i>how many times</i> : I've read three articles.
focuses on the <i>activity itself</i> (it doesn't show whether the activity is completed or not): e.g. I've been writing an article. (We don't know if the article is finished or not.)	focuses on the <i>result or completion of the activity</i> : e.g. I've written an article. (the article is finished but we don't know when.)

Past Perfect Simple

+	had + past participle	<i>The aircraft had landed safely.</i>
-	had not + past participle	<i>The aircraft hadn't landed safely.</i>
?	had.....+ past participle?	<i>Had the aircraft landed safely?</i>

We use the Past Perfect Simple:

- When we are talking about the past and want to mention something that happened earlier:

e.g. *His father was a composer and his grandfather had also been a musician.*

Sometimes we use words like just or already.

e.g. *By the time he was 17, Mozart's reputation had already begun to spread through Europe.*

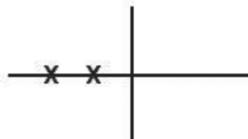

- with words like *when, as soon as, by the time, after* to show the order of events:

e.g. *When Mozart was born, five of his siblings had already died.*

- to report past events using reporting verbs:

e.g. *The man told me he had met my father a long time before.*

past perfect
I had studied drawing before I began to study painting.
(past action completed before second past action)

Present Perfect or Past Perfect

Present Perfect	Past Perfect
before now e.g. <i>That man looks familiar. I've seen him somewhere before.</i>	before then e.g. <i>That man looked familiar. I'd seen him somewhere before.</i>

Past Perfect Continuous

+	had + Verb + -ing	<i>I had been studying really hard.</i>
-	had not been + Verb + -ing	<i>I hadn't been studying really hard.</i>
?	had..... been + Verb + -ing	<i>Had you been studying really hard?</i>

We use the Past Perfect continuous:

- to describe an action that began and was still in progress in the past before another past action started.
- e.g. *We had been waiting for a long time when the bus finally came.*

past perfect continuous
I had been studying for two hours when my friends came over.
(past continuous action occurring when second past action occurred)

- to describe an action that was in progress in the past before another action or event occurred. When the second action happens, it interrupts and marks the completion of the first one.

e.g. *I had been teaching in Tokyo when the earthquake hit.*

- to indicate that the continuous action that finished in the past was the cause of a condition, situation or event in the past.

e.g. *She was very sweaty because she had been running for nearly an hour.*

Future Forms

Many forms are used to talk about the future in English. In many cases, a number of different forms are possible, depending on how we see the event.

1. Present Simple for a timetable

- We can use the *Present Simple* for the future when we are talking about a *timetable*, usually a public one such as a train/ flight timetable.

e.g. The train *leaves* at seven o'clock tomorrow morning.

- We use the Present Simple for the future after these linking words of time: *after, as, as soon as, before, by the time, until, when.*

e.g. I must get to the bank *before* it *closes*.

- in clauses following *what/ who/ which and whatever and wherever.*

e.g. I don't care what *happens* next year.

2. Present Continuous for the future

We use the *Present Continuous* for what someone has arranged to do in the future.

e.g. We're *having* a party tomorrow evening.

3. Be to and be about to

- We use *be to* for a future event that is officially arranged. It is often used in news reports.

e.g. The Queen *is to visit* Portugal in December.

- We use *be about to* for the very near future.

e.g. The plane *is at* the end of the runway. *It is about to* take off.

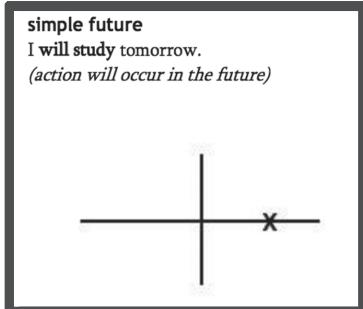

4. Will

We use will

- to make predictions, usually based on our opinions or our past experience:

e.g. I think it'll be extremely hot there.

- to talk about future events we haven't arranged yet:

e.g. We'll probably stay in some sort of mountain lodge there.

- to talk about something we decide to do at the time of speaking:

e.g. Tell me all about it and I'll pass on the information to the rest of the team.

- to make offers, promises or suggestions:

e.g. Don't worry, I'll let everyone know. (a promise)

5. Going

We use going to:

- to talk about events in the future we have already thought about and intend to do:

e.g. We're going to hire a bus. (We intend to go, but we haven't made the arrangements yet.)

- to make predictions when there is present evidence:

e.g. We're going to have a varied trip (I'm judging this from what I know about the plans.)

6. Future Continuous

We use the Future Continuous:

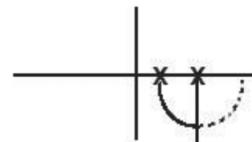

- to talk about an action in progress at a specific time in the future.

e.g. This time next week, I'll be doing my exams.

- to ask politely about future plans:

e.g. Will you be using the computer later on?

future continuous
I will be studying when you arrive.
(continuous future action will continue to happen when another future action occurs)

7. Future Perfect

We use the Future Perfect to talk about an action which will be completed before a point of time, in this case a point in the future.

e.g. I'll have finished the report by Friday night.

future perfect
He will have finished reading by the time you arrive.
(future action will be completed by time another future action occurs)
